Project Design Phase-I: Solution Architecture

Field	Details
Date	25 October 2026
Team ID	N/A (Individual Project)
Project Name	Electric Vehicle Market Performance & Insights
Maximum Marks	4 Marks

Solution Architecture:
Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to find the best tech solution to solve existing business problems, describe the structure, and define features and requirements.

(Note: You can insert your Data Flow Diagram image here to represent the Sample Solution Architecture Diagram)

Component Description Table

Component Name	Description / Role in Architecture	Technology Used
Data Source (Raw Data)	Contains raw global EV market data, including sales volumes, pricing, battery tech, and geographic regions.	CSV / Excel Files
Data Ingestion & Transformation	Ingests raw data, cleanses anomalies, assigns geographic roles, and creates calculated KPIs.	Tableau Desktop (Data Source Tab)
Data Storage (Local Extract)	Stores highly optimized and compressed data locally for quick dashboard rendering and offline development.	Tableau Data Extract (.twbx)

Component Name	Description / Role in Architecture	Technology Used
Data Visualization & Analytics	The core development layer where the 3×3 interactive dashboard and 6-point narrative Story are built.	Tableau Desktop Public Edition
Web Publishing & Hosting	The cloud server that hosts the finalized workbook, making it accessible online without needing local software.	Tableau Public Server
End-User Interface	The front-end view where executives and analysts interact with the dashboard, apply filters, and navigate the story.	Web Browser / Tableau Public UI
