Dashboard Design

Field	Details
Date	26 October 2026
Team ID	N/A (Individual Project)
Project Name	Electric Vehicle Market Performance & Insights
Maximum Marks	5 Marks

Creating an effective dashboard involves thoughtful design to ensure that the presented information is clear, relevant, and easily understandable for the intended audience. Here are some key principles and best practices for dashboard design:

Activity 1: Interactive and visually appealing dashboards

Creating interactive and visually appealing dashboards involves a combination of thoughtful design, effective use of visual elements, and the incorporation of interactive features. Here are some tips to help you design dashboards that are both visually appealing and engaging for users so take care of below points:

- Clear and Intuitive Layout
- Use Appropriate Visualizations
- Colour and Theming
- Interactive Filters and Slicers
- Drill-Down Capabilities
- Responsive Design
- Custom Visuals and Icons
- Use of Infographics

Note: Highlight the major outcomes in form of bullet points

Here are five major outcomes derived from the Electric Vehicle Market Performance & Insights dashboard:

- **Global Market Overview:** The dashboard tracks a massive global EV market with total cumulative sales reaching 1,550.7M, an average vehicle price of $65K, an average range of 325km, and a solid customer rating of 4.09.
- **Top Selling Segments:** Two-Wheeler Scooters lead the market in total volume (174.6M units), followed closely by Hatchbacks (154.9M), Compact SUVs (153.4M), and Sedans (153.4M), highlighting a strong consumer preference for smaller and more affordable daily commuters.

- **Battery Chemistry Adoption & Efficiency:** NMC and LFP are the dominant battery chemistries, capturing 33.80% and 31.99% of the market share respectively. However, emerging Sodium-Ion batteries show a strong performance with the highest median range of 341km.
- **Price vs. Range Dynamics:** The scatter plot reveals a clear trend where larger vehicles like Luxury SUVs and Luxury Sedans offer high range (500km+) but at premium price points ($80k-$120k+), whereas Micro City Cars remain highly affordable but are strictly limited to under 150km of range.
- **Global Production Footprint:** Manufacturing volume is heavily concentrated in key regions like the USA (155.3M), Germany (153.7M), India (159.2M), China, and South Korea, underscoring these nations as the primary hubs for global EV supply chains.

Activity 2: Publish Dashboard on Tableau Public

Publish Dashboard on Tableau Public and Paste the Dashboard Public link below:
