Story

Field	Details
Date	26 October 2026
Team ID	N/A (Individual Project)
Project Name	Electric Vehicle Market Performance & Insights
Maximum Marks	5 Marks

By using stories in Tableau, you can effectively communicate complex data in a way that is both interactive and engaging, making it easier for the audience to follow along and understand the insights. It's a tool for data storytelling, allowing you to present insights in a cohesive, engaging way that takes viewers through a logical progression of findings or analyses.

In Tableau, Story is a feature that allows you to create a sequence of dashboards, visualizations, and text to present data insights in a cohesive and narrative-driven way. It's like a slideshow within Tableau that guides the audience through a series of data points, helping them understand key insights, trends, or outcomes of your analysis.

Observations:

- **Two-Wheeler Scooters Lead in Volume:** The Two-Wheeler Scooter category generates the highest total sales volume among all vehicle categories at 174.6M units.
- **Sodium-Ion Battery Efficiency:** Emerging Sodium-Ion batteries show strong performance, boasting the highest median range of 341km compared to traditional NMC and LFP options.
- **Price vs. Range Correlation:** Larger vehicles like Luxury SUVs offer significant range (500km+) but come at a premium price point ($80k-$120k+), whereas Micro City Cars are affordable but strictly limited to under 150km of range.
- **NMC and LFP Dominate Market Share:** NMC and LFP battery chemistries lead market adoption, capturing 33.80% and 31.99% of the market respectively.
- **Key Manufacturing Hubs:** Global EV production is heavily concentrated in the USA, Germany, India, China, and South Korea, which serve as the primary supply chain hubs.
