Demonstration of Proposed Features

Field	Details
Date	26 October 2026
Team ID	N/A (Individual Project)
Project Name	Electric Vehicle Market Performance & Insights
Maximum Marks	1 Mark

Feature Demonstration Mapping

Below is a breakdown of the core features proposed during the ideation phase and how they have been actively demonstrated in the final Tableau Dashboard.

S.No	Proposed Feature	Demonstration in Final Dashboard / Story
1	**Executive KPI Scorecard**	Demonstrated at the top of the dashboard, displaying high-level aggregated metrics (1,550.7M Total Sales, $65K Avg Price, 325km Avg Range) that dynamically update based on user filtering.
2	**Geospatial Production Mapping**	Demonstrated via the "Global Production Footprint" interactive filled map, highlighting key manufacturing hubs (e.g., USA, Germany, India) based on production volume.
3	**Battery Performance & Adoption Analysis**	Showcased through the "Median Range by Battery Chemistry" bar chart and the "Battery Chemistry Adoption" pie chart, clearly comparing LFP, NMC, and Sodium-Ion technologies against each other.

S.No	Proposed Feature	Demonstration in Final Dashboard / Story
4	**Interactive Global Filtering**	Demonstrated using the dashboard's interactive filter panel (Category, Battery Type, and Manufacturer), allowing stakeholders to slice the entire 3×3 dashboard data in real-time.
5	**Price vs. Range Correlation**	Demonstrated using a detailed Scatter Plot linking Average Price to Average Range, visually confirming the cost premiums associated with higher-range vehicle segments.
6	**Data Storytelling / Presentation**	Executed through the 6-point Tableau Story, sequentially guiding the audience from high-level volume metrics down to granular battery insights for board meetings.
